Features

- **Responsive Design:** Ensures optimal viewing on various devices, from desktops to smartphone

- **Dynamic Content:** Highlights my projects and experiences with engaging visuals and information.

- **Modern UI/UX:** Provides a clean and intuitive user interface for an enhanced user experience

Technologies Used

- **HTML5:** Structure and content of the website.

- **CSS3:** Styling and layout, ensuring a visually appealing design

- **JavaScript:** Adds interactivity and dynamic behavior to the website.

Challenges Faced

1. **Responsive Design Issues:** Ensuring the website looked good on all screen sizes required careful media queries and layout adjustments.

2. **Performance Optimization:** Reducing load times by optimizing images and minimizing unnecessary CSS and JavaScript.

3. **Cross-Browser Compatibility:** Ensuring consistent performance across different browsers (Chrome, Firefox, Edge, Safari) required debugging CSS inconsistencies.

4. **Design Consistency:** Choosing the right color schemes, fonts, and UI elements to maintain a professional and visually appealing look.
